INF2009F Modelling using UML Exercise 4 --------10 Marks	
Student Name	Bianca Ngobeni
Student Number	NGBBIA002
Marks	/10

IMPORTANT NOTE:

- Copied or Plagiarised answers will get 0 and student will be referred to Ayanda Pekane for further actions
- Please upload your completed exercise on Amathuba

Draw a **Use Case Diagram** for the **Meal Management System** of the Specno organisation. Include all the use cases that will be necessary to automate the meal management process for Specno. Include the primary and secondary actors, their associations with the use cases, as well as secondary use cases where dependencies between use cases exist.
