Wireframes

The wireframes were created to provide a visual representation of the system's layout, navigation structure, and key functionality before development began. They were used to plan how users would interact with the system and ensure that important features were easily accessible.

Home Page

The Home Page serves as the main landing page after login. It provides quick access to classes, displays important information, and includes an audit log that the educators and facility administrator to view recent system activity and updates.

Grading

The Grading page is designed to simplify the process of capturing and updating student marks. It includes filtering options for selecting classes and subjects, a marksheet for entering grades, and a save function to ensure records are updated efficiently.

Profiles

The Profiles page allows the Facility Administrator to view, create, edit, and manage student and staff profiles. It includes search functionality to locate records quickly and provides direct access to profile management actions.

Subject Management

The Subject Management page enables administrators to create, update, and organise subjects within the system. It provides a central location for managing subject, levels and class information and assigning subjects to relevant grades or classes.

Analytics

The Analytics page presents academic performance data using summaries and visual reports. It helps users identify trends, monitor student progress, and support informed decision-making through data-driven insights.

Help

The Help page provides user guidance and support resources. It contains instructions, frequently asked questions, and troubleshooting information to assist users in navigating the system and resolving common issues independently.
